^{*}Live released fish swim away upright immediately (within one minute) after release; stressed fish do not swim away upright after release. Dead fish do not exhibit gill movement. Alive and stressed fish exhibit regular gill movement.

(11) Record total number of anglers fishing and time fished (report for each fishing day). Attach additional sheets for more days:

Day 3	good 20 cot Day 4				
Number of anglers fishing	Number of anglers fishing				
Fishing start time	Fishing start time				
Fishing stop time	Fishing stop time				
Number of hours fished	Number of hours fished				

(12) Fish Catch (Record each fish species checked in and the number checked in. Of those checked in, record the number released and harvested (dead). Recording the weight checked in is <u>optional</u>, total weight of bass species checked in may be combined: **NOTE**: Total Number checked in = (Number released alive) + (Number released stressed) + (Number harvested).
